
CONTENTS

REVIEW

Principles of ionization unit development for isotopic analysis of U and transuraniums in solid phase (review) <i>A. S. Berdnikov, L. N. Gall, N. R. Gall</i>	7
Resonant-optical methods of investigations of nonlinear submicron interfaces <i>Ya. A. Fofanov</i>	14

RESEARCHES, INSTRUMENTS, TECHNIQUES

Dynamic force lithography on the thin metallic films in the scanning probe microscope with the piezoresonance detector of local interaction <i>A. O. Golubok, A. L. Pinayev, D. S. Chivilikhin, S. A. Chivilikhin</i>	31
Optimisation of RT-PCR nucleic acid quantitative analysis <i>Yu. V. Belov, A. I. Petrov, V. V. Lavrov, V. E. Kurochkin</i>	44
Anisotropic reinforcement of polymeric nanocomposit properties by electromagnetic orientations of carbon nanotubes <i>Z. Z. Latypov</i>	50
Measurements of wavelength of light sources by ellipsometry technique <i>D. V. Marin, V. N. Fedorinin, T. Khasanov</i>	53
Study of the photomultiplier tubes' response to nuclear radiations <i>M. E. Drobyshevsky, S. V. Bobashev</i>	58
Compact nitrogen cryostat for photomultiply tubes <i>I. P. Zharkov, Yu. I. Zhirko, V. A. Maslov, V. V. Safronov, V. A. Khodunov</i>	66
Wavelet analysis in tomographic images processing <i>M. Ya. Marusina, E. M. Anodina-Andrievskaya</i>	71

THEORETICAL WORKINGS OUT

Some aspects of the energy analyzer work of a cylindrical mirror type. P. I <i>S. I. Shevchenko</i>	76
Mathematical simulation of cyclic regimes of temperatures regulation for polymerase chain reaction (PCR) for molecular colonies method (MCM) by microchip <i>A. L. Bulyanitsa</i>	87
On arbitrariness in the choice of the tensor surface integration of impulse stream density in calculations of radiating pressure forces <i>B. P. Sharfarets</i>	97
Solid body and liquid superficial structure study by ellipsometry considering mathematical inverse problem incorrectness. 1. On features of the inverse problem in the study of the superthin superficial films on semiconductors <i>A. I. Semenenko, I. A. Semenenko</i>	103
Robust methods for signal mixtures separation and independent components analysis in conditions of noised data <i>G. F. Malychina, A. V. Merkusheva</i>	114
System and signal models induced by time transformations <i>Eu. Yu. Butyrsky</i>	128

CONTENTS

Fuzzy-logic processing information systems on the basis of optic information technology <i>M. A. Alles, S. V. Sokolov, S. M. Kovalev</i>	137
