
CONTENTS OF VOLUME 26

NUMBER 1**INSTRUMENT MAKING OF PHYSICAL AND CHEMICAL BIOLOGY**

- K. I. Belousov, A. S. Bukatin, V. I. Chubinskiy-Nadezhdin, V. Y. Vasilyeva, Y. A. Negulyaev, A. A. Evstrapov, I. V. Kukhtevich.* Microfluidic device with Y-shaped design for study of cell migration in concentration gradient of chemoattractants 3
- E. N. Chernova, Y. V. Russkikh, E. P. Podolskaya, Z. A. Zhakovskaya.* Determination of microcystins and anatoxin-a using liquid chromatography-mass spectrometry of unit resolution 11
- L. N. Gall, S. I. Maximov, T. S. Skuridina, N. R. Gall.* Low frequency inductive dielcometry — informative method for the study of the structuring of water in aqueous solutions 26
- D. A. Belov, D. G. Petrov, Yu. V. Belov, N. N. Knyaz'kov, I. G. Kiselev.* Experimental determination of polymerase chain reaction amplification parameters of nucleic acid analyzer 34
- M. M. Ignatchik, Y. S. Posmitnaya, A. A. Evstrapov.* Study of modification wetting properties of the surface of polydimethylsiloxane and the microchannel after exposure by high-frequency plasma in oxygen 41

PHYSICS AND CHEMISTRY OF INSTRUMENT MAKING

- A. V. Grebenyuk, S. M. Irkaev, V. V. Panchuk, V. G. Semenov.* Ab initio calculation of optimum absorber thickness in Mössbauer spectroscopy 47
- A. I. Zhernovoy, S. V. Diachenko.* Compare of sizes end of magnetic moments nanoparticles of a magnetite in a colloid solution and in a powder, prepared by a chemical sedimentation (short message) 54
- Ya. A. Fofanov, B. V. Bardin.* On the polarization responses of the objects with a small optical anisotropy (short message) 58
- D. V. Dvortsov, V. A. Parfenov.* Using laser diodes features for registration absorption lines of iodine 62

DEVELOPMENT OF MEASURING DEVICES AND SYSTEMS

- V. V. Gorbatsky, V. A. Elokhin, V. I. Nikolaev, T. D. Ershov, A. Yu. Elizarov.* Research dissolved in sea water by means of gas mass spectrometer with membrane separator interface 68

**MATHEMATICAL METHODS AND MODELLING
IN INSTRUMENT MAKING**

- N. N. Knyazkov, B. P. Sharfarets.* Acoustics of porous-elastic fluid saturated medium (an overview of the Biot theory) 77

NUMBER 2**INSTRUMENT MAKING OF PHYSICAL AND CHEMICAL BIOLOGY**

- O. V. Mosin, I. Ignatov, V. I. Shvets, G. Tyminski.* Fast atom bombardment mass spectrometry in evaluation of biosynthetic pathways of purine ribonucleoside [²H]inosine 3

D. A. Belov, N. A. Korneva, A. S. Aldekeeva, Yu. V. Belov, I. G. Kiselev. Genetic analyzer resolution increasing at DNA melting temperature determination 17

D. A. Belov, Yu. V. Belov. Fluorescently marked DNA fragments electrophoretic mobility compensation in genetic analysis 23

SYSTEM ANALYSIS OF MEASURING DEVICES AND METHODS

A. G. Varekhov. Fluorescent probing of biological particles suspensions 29

L. P. Kislyakova, A. L. Bulyanitsa, Yu. Ya. Kislyakov, V. I. Gulyaev. Estimation of a people's functional condition after physical activities based on the indicators of the exhaled air condensate registered by polyelectrochemical sensors with using the projective methods of the multidimensional analysis 37

Yu. P. Turov, D. A. Lazarev. Instrumental error sources in quantitative absorption spectroscopy 48

PHYSICS OF INSTRUMENT MAKING

E. V. Butaeva, A. V. Grebenyuk, S. M. Irkaev, V. V. Panchuk, V. G. Semenov. The new algorithm of quantitative analysis in Mössbauer spectroscopy 54

A. I. Zhernovoy, Yu. V. Ulashkevich, S. V. Diyachenko. Magnetic fluid in magnetic field infrared absorption spectra investigation (short message) 60

DEVELOPMENT OF MEASURING DEVICES AND SYSTEMS

T. A. Lukashenko, A. N. Tupik, G. E. Rudnitskaya, A. L. Bulyanitsa, A. I. Tsimbalov, A. A. Evstrapov. Thermal, adhesive and solvent bonding techniques for polymer and polymer-glass microchip device fabrication 64

D. V. Lisin, N. I. Lebedev. Creating a precision circuits for discharge of charge integrator for use in spectrometric devices for observations in the far space 75

MATHEMATICAL METHODS AND MODELLING IN INSTRUMENT MAKING

A. I. Petrov. The transition from a domain specific language to the finite state language in the design analytical instruments 82

A. S. Ilyin. Properties of median under drift of one of group of measuring instruments (on the example of uniform distribution) 93

NUMBER 3

INSTRUMENT MAKING OF PHYSICAL AND CHEMICAL BIOLOGY

G. V. Kotelnikov, S. P. Moiseyeva. Nanocalorimeter for measuring the heat production in mitochondria 3

D. A. Belov, Yu. V. Belov, V. V. Manoylov. Method of processing data in melting of real-time polymerase chain reactions 10

A. G. Varekhov. Conductivity and semiconductor parameters of biological membranes 15

DEVELOPMENT OF MEASURING DEVICES AND SYSTEMS

- L. N. Gall, A. A. Semenov, V. N. Kudriavtsev, A. V. Lisunov, I. G. Lesina, B. V. Ivanov, A. N. Bukin, [A. S. Shtan], G. E. Kirianov, A. Antonov, N. R. Gall.* Novel solutions in isotopic mass-spectrometric analysis of hydrogen-helium mixtures. How to get reliable data 24
- T. E. Kuleshova, M. N. Blashenkov, D. O. Kuleshov, N. R. Gall.* Development and biological testing of the laboratory phytotron with possibility of varying the emission spectra and the daily exposure 35
- S. V. Kuleshov, A. Y. Aksenov, A. A. Zaytseva.* An approach to the software defined camera creation (review) 44

MATHEMATICAL METHODS AND MODELLING IN INSTRUMENT MAKING

- V. V. Manoylov, Yu. A. Titov, A. G. Kuz'min, I. V. Zaruzkiy.* Methods for data processing and classification for mass spectra of exhaled gases using discriminant analysis 50
- B. P. Sharfarets, E. B. Sharfarets, [N. N. Knyaz'kov], T. N. Pashovkin.* Some features of the numerical solution of tasks of thermoelasticity and hydrodynamics heat-conducting compressed viscous liquid by means of universal packages 57
- A. S. Ilyin.* Properties of median under drift of one of group of measuring instruments at normal distribution 64
- V. B. Almazov.* A model of transition field between quadrupole mass filter and prefilter 75
- A. S. Ilyin.* Bases of dynamic correction of sensitivity coefficients of group of the same sensors (on the example of cosine distribution law) 83
- B. P. Sharfarets.* About waveguide propagation of sound beams in a nonlinear medium. Overview 95

NUMBER 4

PHYSICS OF INSTRUMENT MAKING

- A. V. Kovalchuk, A. A. Mitina, E. A. Polushkin, E. I. Galperin, T. G. Dyuzheva, I. A. Semenenko, A. I. Semenenko, S. Yu. Shapoval.* Potentiality and peculiarity of ellipsometry in the surface studies of liquids 3
- A. S. Berdnikov, I. A. Averin, N. K. Krasnova, K. V. Solovyev.* Universal expressions for 3D electric and magnetic potentials which are uniform in Euler terms 13
- A. S. Berdnikov, I. A. Averin, N. K. Krasnova, K. V. Solovyev.* Integral expressions for 3D electric and magnetic potentials which are uniform in Euler terms and have non-integer orders of uniformity 31
- B. P. Sharfarets.* On the dynamics of shock waves in the liquid. Overview 43

MATHEMATICAL METHODS AND MODELLING IN INSTRUMENT MAKING

- A. A. Evstrapov, V. E. Kurochkin, B. P. Sharfarets.* The modeling of microfluidic processes. Account of the surface forces 55

<i>A. P. Scherbakov.</i> Simulation of ion-molecule collisions in inhomogeneous time-depended electrodynamic fields	64
---	----

INFORMATICS, COMPUTER TECHNICS AND CONTROL

<i>A. Grigoryev, V. Mamaev.</i> Application of artificial neural networks in knowledge control	77
<i>A. Grigoryev, V. Mamaev.</i> Experience of use of neural networks in the analysis and the structural reconstruction of subject knowledge of the specialist	85

FROM EDITION

Sobir Mulloevich Irkaev (obituary)	94
