
CONTENTS OF VOLUME 35

NUMBER 1

SCIENTIFIC ARTICLES ON MEMORY L.N. GALL

Contribution of L.N. Gall to development of mass spectrometric instrumentation:
past and present

I. R. Gall, V. D. Sachenko, N. R. Gall 3

The role of L.N. Gall in the formation of a new area of research "Low and superlow
fields and radiation in biology and medicine"

G. M. Levkovskaya, I. R. Gall, A. N. Bogolyubova 14

Prospects for the development of high-temperature mass spectrometry
for studying inorganic materials

V. L. Stolyarova, A. L. Shilov 22

Applying artificial intelligence techniques
in quadrupole mass spectrometer data analysis

Y. V. Lyamina, Yu. A. Titov, A. G. Kuzmin, A. Yu. Zaitseva 41

INSTRUMENT MAKING OF PHYSICAL AND CHEMICAL BIOLOGY

Viability and transfection of HeLa cells on the surface of semiconductor nanowires

*S. V. Shmakov, Z. F. Sosnovitskaia, V. M. Kondratev,
A. S. Bukatin, A. D. Bolshakov* 47

PHYSICS OF INSTRUMENT MAKING

Horizontal Hele-Shaw installation for researching laminar cellular flames

M. M. Alekseev, O. Yu. Semenov, S. A. Rashkovsky, S. E. Yakush 56

Investigation of the surface of a film reflector based on $\text{SiO}_2\text{--ZrO}_2\text{--P}_2\text{O}_5\text{--CaO}$
for an optical interferometer system

E. E. Maiorov, V. V. Kurlov, A. V. Arefiev, V. P. Pushkina 64

Selection of a superluminescent radiation source for the microinterference method
of surface relief control

*E. E. Maiorov, R. B. Guliyev, Y. M. Borodyansky,
A. V. Dagaev, I. S. Tayurskaya* 71

Method for identification of working zone of magnetic force stability
in particle susceptibility control magnetometer

*D. A. Sandulyak, A. S. Kharin, A. A. Sandulyak, M. N. Polismakova,
A. V. Sandulyak, D. A. Golovchenko, A. D. Kosenkov* 78

The effect of speckle fields on measurement results when monitoring
a deformed surface with a low-coherence interference installation

E. E. Maiorov, G. A. Kostin, N. E. Baranov 85

Determination of surface wave spectrum parameters using video recording
in natural light

V. V. Bakhanov, D. D. Razumov, M. B. Salin 93

MATHEMATICAL METHODS AND MODELLING
IN INSTRUMENT MAKING

Development of a software-algorithmic method for processing
the thermocatalytic sensors characteristics for the identification
of flammable gases in air and multicomponent mixtures

T. V. Osipova, A. M. Baranov, I. I. Ivanov 106

Evaluation of the properties of chaotic signals affecting the reliability
of data transmission

A. A. Gavrishev, D. L. Osipov 122

NUMBER 2**INSTRUMENT MAKING OF PHYSICAL AND CHEMICAL BIOLOGY**

- Laser technology for removing polyimide coating from quartz capillaries
*V. E. Kurochkin, F. L. Vladimirov, A. S. Al'dekueva,
 N. A. Korneva, M. V. Volkov, M. S. Shlyakhtin, D. V. Zhurba* 3
- Correction of fluorescent signals distorted by overlapping spectral bands
 in the "NANOFOR SPS" sequencer
*V. V. Manoilov, A. G. Borodinov, A. Ya. Loginov,
 A. I. Petrov, I. V. Zarutsky, V. E. Kurochkin* 20

PHYSICS OF INSTRUMENT MAKING

- Parametric radiation antenna for hydroacoustic monitoring of the water
 body surface: analysis of application possibilities
 in wave measuring equipment (review)
E. V. Voloschenko, S. P. Tarasov, A. P. Voloschenko 36
- Experimental study of interference setup using white light source
 for surface microrelief monitoring
E. E. Maiorov, V. P. Pushkina, R. B. Guliyev, A. V. Dagaev 57

DEVELOPMENT OF MEASURING DEVICES AND SYSTEMS

- Architecture of the power supply system for space experimental complexes based
 on lithium-ion batteries
D. V. Lisin 67

**MATHEMATICAL METHODS AND MODELLING
 IN INSTRUMENT MAKING**

- Algorithm for calculating the position and speed of objects on a plane using data
 from a monocular camera
*N. A. Vodichev, D. A. Gavrilov, A. V. Leus, V. A. Efremov, I. V. Kholodnyak, V. A. Zuev,
 M. M. Parshikov, A. Yu. Troegubov, N. V. Gershtein, V. E. Laukhin, A. E. Antipov* 78
- Regarding the problem of solving the Poisson–Boltzmann equation
 when the Debye–Huckel approximation conditions in electrokinetic
 processes are not met
B. P. Sharfarets 97

NUMBER 3

PHYSICS OF INSTRUMENT MAKING

Electric fields of cylindrical RF ion guides <i>A. S. Berdnikov, S. V. Masyukevich, K. V. Solovyev, Yu. I. Khasin</i>	3
Simulation of cylindrical RF ion guides using analytical electric fields <i>A. S. Berdnikov, S. V. Masyukevich, T. V. Pomezov, K. V. Solovyev</i>	18
Linear ion trap with an island of stability formed by quadrupole excitation <i>A. I. Ivanov, P. V. Bugrov, N. V. Konenkov</i>	38
Fundamentals of interaction between a uniform field and a single-component spherical electric field strength sensor with an open system of electrodes <i>S. V. Biryukov</i>	45

MATHEMATICAL METHODS AND MODELLING
IN INSTRUMENT MAKING

Simulation of operation of a gridless ion gate for an ion mobility spectrometer <i>I. V. Kurnin</i>	56
Comparative analysis of the possibilities of polynomial and analytical approximations of polarization-optical responses of magnetic nanofluids <i>Ya. A. Fofanov, V. V. Manoilov</i>	64

DEVELOPMENT OF MEASURING DEVICES AND SYSTEMS

Equipment for moccvd epitaxy of gallium nitride on silicon substrates up to 200 mm in diameter for the production of transistor heterostructures <i>M. G. Biryukov, P. E. Afonin, S. A. Shchurenkova, D. Y. Pugachev, A. F. Tsatsulnikov, A. V. Sakharov, E. E. Zavarin, W. V. Lundin, D. S. Bazarevskiy</i>	73
Development and laboratory testing of a led phyto-irradiator <i>E. N. Rakutko, S. A. Rakutko, G. V. Medvedev, S. V. Gulin</i>	82

INSTRUMENT MAKING OF PHYSICAL AND CHEMICAL BIOLOGY

Microfluidic organ-on-a-chip device with porous membrane for long-term cell cultivation <i>L. A. Altyinbaev, P. S. Pleshakov, N. A. Filatov, A. S. Bukatin</i>	95
Protective filters against dust and dirt particles for droplet microfluidics applications <i>N. A. Filatov, D. V. Pankratov, A. A. Tiushkevich, P. S. Pleshakov, A. S. Bukatin</i>	107

INFORMATICS, COMPUTER TECHNICS AND CONTROL

Application of nonlinear dynamics methods for analyzing the properties of signals formed on the basis of ternary sequences <i>A. A. Gavrishev, D. L. Osipov</i>	119
--	-----

NUMBER 4

EQUIPMENT AND SYSTEMS

Low-voltage miniaturized electron-optical systems. Review <i>S. O. Veresov, O. M. Gorbenko, A. O. Golubok</i>	3
Instrument database of russian scientific institutions: status, problems, and solutions <i>E. V. Lutschekina</i>	28

INSTRUMENT MAKING FOR BIOLOGY AND MEDICINE

Optical multisensory system for non-invasive diagnostics <i>S. N. Glebov, M. S. Mazing, L. V. Novikov</i>	41
Concerning analytical sensitivity of a genetic analyzer <i>V. E. Kurochkin, F. L. Vladimirov, A. S. Aldekeyeva, N. A. Korneva</i>	47
Development and laboratory testing of a prototype automated device for tuberculosis diagnosis using real-time PCR <i>A. P. Tkachuk, A. G. Alatyrev, V. A. Ponomarev, D. V. Kanikevich, Yu. K. Dzagoeva, A. A. Kazulina, T. E. Tyulkova, A. G. Samoylova, I. A. Vasilyeva</i>	61
The use of artificial intelligence in the analysis of ultra-high resolution electrocardiograph data <i>E. A. Denisova, A. A. Kordyukova, D. O. Shevyakov</i>	72

PHYSICS OF INSTRUMENT MAKING

The effect of the geometry of the radio frequency ion funnel of the mass spectrometer interface on the characteristics of the output ion pulses <i>I. V. Kurnin</i>	79
Main principles of wire application for magnetic measurement of accelerators elements. Part 1. Based-on-wire magnetic measurement techniques and systems <i>I. Yu. Nikolaichuk</i>	85
Method refinement of seawater density dynamic measurements by marine autonomous probe-profilers <i>I. Yu. Semykina, L. A. Krasnodubets</i>	102
Results of experimental research into the electroacoustic characteristics of composite piezoceramic transducers with overlays for marine ecology monitoring tasks <i>V. I. Kaliuta, V. V. Demenchuk, P. P. Pivnev, S. P. Tarasov</i>	113
Single-component spherical electric field strength sensor with an open system of electrodes in the field of a conducting plane <i>S. V. Biryukov</i>	122
